

Sentinel Pro2: the new generation of compact, high-efficiency UPS

Modern design, reduced dimensions and high efficiency define the new range from 700 to 3000 W.

Legnago, 15th January 2026 — Riello UPS, a brand of the Riello Elettronica Group and an Italian and global leader in the production of uninterruptible power supply systems (UPS – Uninterruptible Power Supply), introduces Sentinel Pro2 (SP2), the new generation of high-efficiency UPS with a completely renewed design to ensure maximum performance, reliability and energy savings in an extremely compact footprint.

The new Sentinel Pro2 range has been developed to provide maximum protection for IT systems, networks, medical equipment and sensitive industrial applications, representing the perfect combination of advanced technology, Italian design and ease of use. Thanks to its high-efficiency online double-conversion architecture, SP2 ensures continuous power availability and optimal power quality under all mains conditions.

Manufactured with improved ventilation and a modern design, Sentinel Pro2 delivers high efficiency of up to 93.7% and a power factor of 1, allowing full use of the available real power.

It is available in versions from 700 W to 3000 W, all equipped with EnergyShare outlets for intelligent load management and a LED display for immediate system status recognition.

Sentinel Pro2 combines high performance, minimal noise and refined design, embodying Riello UPS values: reliability, efficiency and Made in Italy quality for uncompromised power continuity.

“In applications such as IT, where space is increasingly limited, it is important to optimize footprint without compromising performance – said Stefano Squarcini, Product Manager at Riello UPS – That is why we have completely redesigned our Sentinel Pro range to ensure very high efficiency and maximum reliability in a reduced footprint”.

Information about Riello UPS

Riello UPS is the brand of uninterruptible power supplies for Data Centres, electromedical applications, security and emergency equipment, industrial processes, and communication systems, designed and produced by RPS S.p.A., a company based in Italy and part of the Riello Elettronica Group. RPS S.p.A. is the industry leader in Italy and firmly placed among the top five companies in the world in technological research, production, sales, and assistance. The pursuit of quality, the optimization of resources and a strong drive towards technological innovation, together with seriousness, consistency, and experience, make RPS S.p.A. a company able to meet the needs of a fast-growing market. RPS S.p.A. has two production sites in Italy, 15 subsidiaries placed between Europe, the United States, the United Arab Emirates, China, India, Singapore, and Australia, and a presence in over 90 countries worldwide, that offers a very high level of customer service.
